

Majestic-Farrell Lake W.I.

The June meeting of the M.F.W.I. was held at the home of Mrs. Bolduc on June 17th with the president, Mrs. J. Loeck, presiding.

The meeting opened with "O Canada" followed by the Creed. The minutes of the last meeting were read and approved, financial report given, and correspondence read.

Mrs. Gordin gave a very good report of the Provincial Convention which she attended in Edmonton. The theme running through the whole thing was "Progress through Peace."

Mrs. Hewson was appointed delegate to attend the Constitution Committee in Delia, on June 17th.

Our annual picnic was planned for July 2nd, at the usual M.L.K. picnic grounds. Following members were appointed:

Booth Convener—Mrs. George Carson.

Sports—Mrs. C. Cannell.

Mrs. G. McKay.

Lunch Convener—Mrs. M. Hewson.

Quit Raffle—Mrs. A. Dodd. The W.I. will sponsor a shower for Miss Ruth Sand, at Springwater on Wednesday afternoon, June 22nd. Committee appointed—

Lane—Mrs. F. De Matt, Mrs. W. Newman.

Program—Mrs. G. McKay, Mrs. A. McLaren.

Decorating—Mrs. S. Kivitt.

Bride's Table—Mrs. A. Bolduc.

Everyone is invited to attend. The August meeting, annual Grandmother's Day, will be held at Springwater on August 4th.

Lunch—Mrs. A. Bolduc, Mrs. O. Hands, Mrs. A. McLaren.

Program—Mrs. G. McKay, Mrs. Hewson.

The June entertainment will be a dance at Springwater on June 24th.

We were thrilled to have as a visitor Mrs. G. Strachan from Scotland. Mrs. Strachan is a member of the W.I. in Scotland, and is visiting her brothers (McLaren Bros.) here. She gave a short talk concerning our W.I. with here at home.

The meeting closed with "God Save the Queen." There were

18 members and 3 visitors present. The surprise parcel was won by Mrs. A. Bolduc. A delicious lunch was served by the hostesses: Mrs. A. Bolduc, Mrs. A. Beaton, Mrs. J. McMurchie.—Con

U.S. Wheat Carryover

When the 1934-35 crop year ends on June 30 it appears likely that the U.S. will have a wheat carryover of 1,000 million bushels. This volume is sufficient to meet domestic consumption for 18 years, for on the average that country uses about 525 million bushels annually. This figure, however, does not include exports.

Approximately two-thirds of the total carryover is hard winter wheat. The following is a breakdown of the total expected carryover by type: hard winter wheat 604 million bushels; hard spring wheat 148 million; white wheat 126 million; soft red wheat 40 million; mixed wheat 12 million; and durum 3 million.

Of the total 1,000 million bushels, only 40 million bushels will be in government hands or under government control.

Random Notes

Recently, we received copies of two issues of Social Credit election propaganda; one a reprint by the *Idaho Herald* of a TV address by Premier Manning, the other a pamphlet issued by the Alberta Social Credit League.

This last goes into long and voluminous detail as to what has been accomplished in the twenty years of Social Credit administration. However, in the usual Social Credit "bolder than thou" manner, the opening statement asks: "Do you know that..."

The Province of Alberta was formed in 1905. At that time there was no debt. The statement made in 1905: "The government was in debt from 1905 to 1910." They left a debt of \$100,000,000. The U.P.A. government, 1921-30, left an additional debt of \$87,000,000. In all a total debt of \$187,000,000. This is all quite true, but it doesn't give all the facts. The first dominion census taken in Alberta, 1901, gives a population of 73,022. Yes, less than a 100,000! Four years later, the province was founded. The government of those days was faced with the problem of building many of the necessities which are still in existence today: the Legislative building, the University of Alberta, as well as various other amenities useful to the new state. Where, but for borrowing, were the funds for such development? Not until after the wheat lands east of the Red Deer River were thrown open in 1909, did the country make much progress. Due to this development, the census of 1911 showed a population of 974,285; the province was growing fast under Liberal administration.

Now should it be forgotten that not until 1922 did the province get control of its natural resources. This was during the U.P.A. tenure of office, and at the census of 1931 it was revealed that the population had doubled in number to a total of 733,000. With services of all kinds to provide for this quickly growing community, schools, hospitals, services of various kinds, it is not surprising that more money had to be borrowed; particularly when it is remembered that the closing years of the Farmer's government coincided with the worst-wide depression of 1929 and the subsequent early years of the "dirty thirties."

In spite of long promises by

Mr. Aberhart—there was a dispute over a speech a Seaford, Ont., where the secretary of the Ontario B.C. League declared that Mr. Aberhart had said there was no reason why the basic dividend shouldn't rise to \$500 a month. However, the president of the League, countered by reporting that he had taken up the matter with Mr. Aberhart, who he decried as no leader of men, but who remarked that it could rise to \$100 a month!

The matter of fact the Social Credit government was able to do little by its own initiative when in its first few years. In 1905, and fish, cheese and apples were received by Albertans from their fellow Canadians down East. The steady rise and threats of Hitler led to an increase in wheat prices from then on. The rise in wheat, however, was the greatest stimulus to prosperity—for those outside the danger zone. In 1921, the U.P.A. government began and Alberta profited. Any other government would have faced just as well. The opposition declares, better!

The people of the province have, presumably, read or heard all the arguments on both sides. All that remains is to cast a ballot. But get out and vote; remembering the Social Credit pledge of the late thirties—

1. I will make it my business to vote at every possible opportunity.
2. I will vote only for those candidates who pledge themselves to stand for efficiency and economy in all forms of government.
3. I will remember that those for whom I vote are spending money—that every dollar they spend, or promise to spend unwisely or extravagantly comes out of MY pocket.

Farm Machinery Trade

During 1934 Canada exported less than \$20 million in value of \$76.8 million while imports were valued at \$14.8 million. Exports included Canadian Farm Equipment. Exports were at almost the same level as in 1933 but imports declined from \$105 million the previous year. Exports of farm machinery were \$5,705,000 and imports \$1,887,000.

When the new \$10,000 Canadian Pacific Bus, designed by British, has been launched next summer (1936) it will give employment to some 300-350 (including sub-contractors) plants in bond during her fitting out.

Understand Hindustani?

Language is only one of the difficulties faced by Canadian who buy and sell in foreign markets. Currents, exchange and trade regulations—payments and collections—market information—locking sales representatives abroad—all call for prompt, efficient handling over long distances.

The chartered banks are an essential part of this whole trade picture. Through their foreign branches, agents and representatives they provide permanent, on-the-spot contact in commercial centers around the world.

Facilitating the flow of international trade is only part of the work carried on every day by the chartered banks of Canada. Your local branch is a convenient banking service—where you can obtain expert help on money matters large and small.

Only a chartered bank offers a full range of banking services, including:

CURRENT ACCOUNTS
The individual and companies who are the backbone of our country need prompt service on deposits, payments and collections.

SAFETY DEPOSIT BOXES
Keep your precious papers and other valuables in your safety deposit box.

SAVING BY MAIL
Convenient and sure plan. All your money banking can be handled in this way.

Forestry Association official urges forest fire prevention

By ALAN BROWN

Manager, Prairie Provinces Division, Canadian Forestry Association

Basaltian this year celebrates its fifth anniversary as a Province. Its development and the progress of its people are being depicted in pictures and marked by special activities. This is a year to review past accomplishments, and at this half century mark, not only of the past, but of the future, with the realization of what we can envision for the heritage of natural resources. It is the promise of increased opportunity and happiness for our citizens.

Now as during the Jubilee Year, however better acquainted with the great Province in which we live, realizing that our northern sector has over 600,000 miles of forest, and that above our wilderness is a vast resource which only smart development can create a new industrial empire in that area rated fifty years ago as the "northern wilderness".

One of the great goals of Basaltian-forestry has become a new industrial empire, with its own resources, and new sources of employment. It is only part of the story of our provincial timberland. The 20,000 square miles of productive forest, approximately located north of the grain growing plains, can produce wood for pulp to support three fifty million dollars worth of living and growing, forest products. The flow of streams and climatic balance the arctic lands in the south.

At present, forest is the "green" "horizon" which is the source of our material resources. It is the great resource to revitalize and create a new industry. Forests are drastically reduced, by fire or other means, destruction is usually fatal and wide areas of adjacent country are affected. These forests are the source of our raw materials, and the source of our food and fuel. Forests are the source of our raw materials, and the source of our food and fuel. Forests are the source of our raw materials, and the source of our food and fuel.

Forest Conservation Week, May 25 to 31, is a reminder that the Jubilee Year of Basaltian-forestry has become a new industrial empire, with its own resources, and new sources of employment. It is only part of the story of our provincial timberland. The 20,000 square miles of productive forest, approximately located north of the grain growing plains, can produce wood for pulp to support three fifty million dollars worth of living and growing, forest products. The flow of streams and climatic balance the arctic lands in the south.

Pasturing too early damages forage crops

Some farmers may be short of hay and silage and thus tempted to turn their cows out too early. This is false economy. You are further losing money by having to pay to carry the animals around the farm or to feed them after they damage the forage crops by trampling them.

In some areas animals are allowed to pasture too early. This is false economy. You are further losing money by having to pay to carry the animals around the farm or to feed them after they damage the forage crops by trampling them.

Increased acreages many crops anticipated in southern Alberta

When crops are turned into silage or lignum-vivum pastures, the acreage of silage and lignum-vivum pastures will be increased. The following projects are anticipated for the year 1965:

1. Change from dry feed to pasture grazing to prevent erosion and improve the quality of the feed.

2. Give cows their own feeding area and let them graze on the pasture. This will save the cost of feed and improve the quality of the feed.

3. Locate a rack near the water source and let the cows graze on the pasture. This will save the cost of feed and improve the quality of the feed.

4. Give cows their own feeding area and let them graze on the pasture. This will save the cost of feed and improve the quality of the feed.

5. Locate a rack near the water source and let the cows graze on the pasture. This will save the cost of feed and improve the quality of the feed.

6. Give cows their own feeding area and let them graze on the pasture. This will save the cost of feed and improve the quality of the feed.

7. Locate a rack near the water source and let the cows graze on the pasture. This will save the cost of feed and improve the quality of the feed.

8. Give cows their own feeding area and let them graze on the pasture. This will save the cost of feed and improve the quality of the feed.

9. Locate a rack near the water source and let the cows graze on the pasture. This will save the cost of feed and improve the quality of the feed.

10. Give cows their own feeding area and let them graze on the pasture. This will save the cost of feed and improve the quality of the feed.

11. Locate a rack near the water source and let the cows graze on the pasture. This will save the cost of feed and improve the quality of the feed.

12. Give cows their own feeding area and let them graze on the pasture. This will save the cost of feed and improve the quality of the feed.

The week in Britain

Conducted by Lloyd "A" Percival

Canadian order

The Manitoba hydro-electric board has ordered from a U.K. firm that has a similar design of 20,000-horsepower turbines, which are to be installed at a new power station near Winnipeg. The firm are engaged on building power stations in Canada, and have a long experience in the design and construction of large-scale hydro-electric plants.

\$88 million
Contracts worth \$88 million have been awarded to a U.K. firm for the manufacture of rolling stock and other equipment for the British Railways. The firm are also engaged on building power stations in Canada, and have a long experience in the design and construction of large-scale hydro-electric plants.

On view in London
Canadian fur made a splendid show in London recently. The opening of the London fur market has been a success for this kind of trade, which has been a success for this kind of trade, which has been a success for this kind of trade.

Record exports
Exports of U.K. radio equipment reached a record of \$100 million in the first quarter of 1965. This was a record for this kind of trade, which has been a success for this kind of trade, which has been a success for this kind of trade.

Further this sound
The British P.T. telephone firm has announced that it will be installing a new system of telephone exchange in London. This will be a success for this kind of trade, which has been a success for this kind of trade, which has been a success for this kind of trade.

Himalayan assault
The Himalayan assault on the world's highest peaks has been a success for this kind of trade, which has been a success for this kind of trade, which has been a success for this kind of trade.

More workers
Labour force in the U.K. is expected to reach a record of 10 million in the first quarter of 1965. This will be a success for this kind of trade, which has been a success for this kind of trade, which has been a success for this kind of trade.

Rasby to sea
The Rasby to sea has been a success for this kind of trade, which has been a success for this kind of trade, which has been a success for this kind of trade.

Should vaccinate cattle now against blackleg
The Ministry of Agriculture has announced that cattle should be vaccinated against blackleg. This will be a success for this kind of trade, which has been a success for this kind of trade, which has been a success for this kind of trade.

TRY AND STOP ME!
The Ministry of Agriculture has announced that cattle should be vaccinated against blackleg. This will be a success for this kind of trade, which has been a success for this kind of trade, which has been a success for this kind of trade.

by Alice Bursell
The Ministry of Agriculture has announced that cattle should be vaccinated against blackleg. This will be a success for this kind of trade, which has been a success for this kind of trade, which has been a success for this kind of trade.

Household Air Department
The Ministry of Agriculture has announced that cattle should be vaccinated against blackleg. This will be a success for this kind of trade, which has been a success for this kind of trade, which has been a success for this kind of trade.

WINDMILL
The Ministry of Agriculture has announced that cattle should be vaccinated against blackleg. This will be a success for this kind of trade, which has been a success for this kind of trade, which has been a success for this kind of trade.

Drive With Care!
The Ministry of Agriculture has announced that cattle should be vaccinated against blackleg. This will be a success for this kind of trade, which has been a success for this kind of trade, which has been a success for this kind of trade.

VIRGIL
The Ministry of Agriculture has announced that cattle should be vaccinated against blackleg. This will be a success for this kind of trade, which has been a success for this kind of trade, which has been a success for this kind of trade.

World Happenings In Pictures

★ ★ ★ ★

★ ★ ★ ★

★ ★ ★ ★

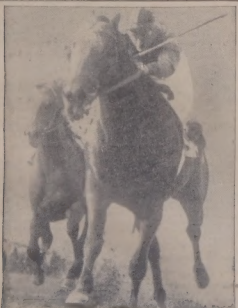

SEA OF DESTRUCTION—Captain Virgil Bunker, 24, of Fall River, Mass., stands at the prow of the first ship to reach Canada, surveying the sea of destruction which poured out and sank in the vicinity below decks. At least three persons were killed and many buildings leveled along the ship's path.

COLLECTOR'S TREASURES—The term applies to both the world flags, surrounded by flags of the 21 countries of the Americas, and the unusual variety of stamps of President Eisenhower. Gift of Linda Christian, the player occupies a prominent spot in her White House office. The stamps, symbols of unity of the family of American nations.

LT. BERT C. PHYLYTON of Wadsworth, Ohio, who was one of three pilots who shot down two Communist MIG's in a skirmish off the Korean coast.

SWAPS, ridden by Jockey Willie Shornaker, pounds down the final yards of the homestretch, to beat out Nashua, left, in the 10th running of the Kentucky Derby.

LINDA CHRISTIAN was granted a divorce recently from Tyrone Power after she failed to accept that the film star "married" her for more than one year for his marital freedom.

JUST BRENNAN—George Brown, Lewis, disbursing officer, dramatically counterattacks 120 thousand dollars all in few-dollar bills. The "cash" money will be used to pay officers and men of the (Canadian) Royal Air Station, near Chongqing, Ill., in order to determine how their money is spent in the community.

WINNING MILLER—It's just as difficult for the batter as it is for the pitcher to get the ball. The big slugger of Herb Sobers left behind a record in practice with the Cleveland Indians, the 25-year-old sophomore to the major in Poughkeepsie, N.Y. He recently racked up 14 strikeouts in one game, only two less than the record of 15 set in 1903 by veteran batsman Sam Rice.

VINYLE FOX IN MILES—A fire in an empty warehouse built a huge column of smoke into the air as it erupted into full fury in Delaware, Pa.

CHIEF RANGER IN UNIFORM—Princess Margaret visits a handicraft exhibition in London of the Ranger Branch of the Girl Guides. The Princess is accompanied by Chief Ranger.

LAS VEGAS, Nev.—Across John Crawford was married to Alfred N. Beach, president of the Pepsi-Cola Co. in a surprise ceremony May 10 in the restaurant of the Flamingo hotel. The women actress and Steele met about three years ago. They were seen together in Hollywood recently when he was in southern California on a business trip.

FUTURE FORESTRY—Paul Brown of the Great North Woods in 1975 will be a forested tree against such as the one pictured above. Shaded against reflective products, 1975 forest trees, year-around the world, make it fire resistant and mean it is desired shade while tree is growing. A tree is shown in front of a trade association slide-dim presentation recently viewed by members at annual meeting of U.S. Chamber of Commerce, Washington, D.C.

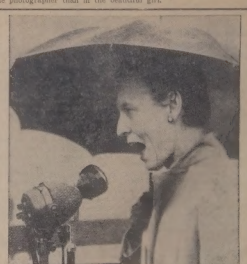

A. G. STOTHART (right) and Dr. H. T. Fiedler of the Lacombe Experimental station staff, inspect a group of pigs from the first litter of the new breed of hogs developed at the Lacombe station. Shows here, in a typical eight months old sow nursing the ground reproduction and confinement of the new-bred, which has big ears and combine the best of the Lacombe Chester white and Berkshire breeds, all of the Yorkshire. Litters of the new breed reportedly mature faster, reducing feed costs before they are marketed.

JOHN GIARDO, of Little River, N.B., examines pieces of meat which landed on his farm 20 feet from where he was working. Halifax antiquaries believe he may have been flung to sea phenomenon.

DANIELLE SAINT-ON, pretty French model, says hello to a girl in a photo taken on the set of a movie. She is appearing in the subject and expects to be more interested in the photographer than in the beautiful girl.

LADY LARNETTE AT RALLY—Dr. Edith Summerskill, British MP, addresses a May Day gathering in London's Hyde Park. Moments later the rain took over and the crowd dispersed.

Canadian statistics report

(A. W. Barker)

Foreign Trade: Canada sold more agricultural and vegetable products abroad than it imported. The value of exports was \$1,000,000,000, and the value of imports was \$900,000,000. The value of exports was \$1,000,000,000, and the value of imports was \$900,000,000. The value of exports was \$1,000,000,000, and the value of imports was \$900,000,000.

Manufacturing: Steel ingot and pig iron output increased in April over the same month of 1934. The value of exports was \$1,000,000,000, and the value of imports was \$900,000,000. The value of exports was \$1,000,000,000, and the value of imports was \$900,000,000.

Mineral Products: Crude oil production in April was 1,000,000 barrels, and the value of exports was \$1,000,000,000, and the value of imports was \$900,000,000. The value of exports was \$1,000,000,000, and the value of imports was \$900,000,000.

Food: Cattle and hogs were slaughtered in April at a rate of 1,000,000 head, and the value of exports was \$1,000,000,000, and the value of imports was \$900,000,000. The value of exports was \$1,000,000,000, and the value of imports was \$900,000,000.

Funny and Otherwise: The value of exports was \$1,000,000,000, and the value of imports was \$900,000,000. The value of exports was \$1,000,000,000, and the value of imports was \$900,000,000.

The value of exports was \$1,000,000,000, and the value of imports was \$900,000,000. The value of exports was \$1,000,000,000, and the value of imports was \$900,000,000. The value of exports was \$1,000,000,000, and the value of imports was \$900,000,000.

Governor-General Opens Saskatchewan's Museum of Natural History

By a very happy coincidence, the Governor-General, Lord Tweedsmuir, was able to visit the new museum of natural history in Regina, Saskatchewan, on his way to the west. The museum, which was opened by the Governor-General, is a fine example of the work of the Canadian Museum of Natural History. The museum is a fine example of the work of the Canadian Museum of Natural History.
